Willow Cree School - Beardy and Okemasis reserves near Duck Lake New Construction

Pre-design

Delivered planning study to assess and understand facility and program needs, constraints of the existing building fabric, opportunities for development.

Consulted with Elders to establish a common Vision for the Cultural and Heritage 'soul' of the building

Worked closely with community leaders to develop the design with the Cultural Vision as the cornerstone of the design

Project Delivery

Prepared an integrated Project Delivery Schedule, including planning, design, review, tender, construction, commissioning, and sequenced moving plan for each stage of the project in order to provide seamless and integrated project delivery.

Schedule included Critical Path analysis to identify and track ongoing timeline targets throughout the Project Delivery

Design and Construction Documentation

Thorough Schematic Design, Design Development and Construction Documentation process with reports and cost evaluation at each stage to integrate client input at all levels of the project.

Unique planning elements such as 'Cultural Spaces' and 'Community Pods' to address cultural needs specific to aboriginal students and staff.

Careful preparation of Construction Documents and Specifications minimized change orders on site.

Developed an integrated Risk Management

Plan to reduce risks for a renovation project in an occupied post secondary institution.

Identified opportunities for cost reduction from 'smart' design solutions that met project objectives while working with the constraints of the existing building.

Construction Administration

Managed bid process and construction award

Worked with Client and Contractor to implement and integrate all aspects of the project for seamless delivery from pre-design planning through construction completion and sequenced moving at each stage of the redevelopment.
